

Take Your Cosmetic Consulting to the Next Level with the New Generation of Skin Analysis Software SCS

- Completely intuitive and full of possibilities: Measurements with **probes**, **camera skin & hair images** and **full face photography** in one **software**. Ideally suited for the point of sale and beauty salons.
- Experience the **wow effect** when you share the vivid, meaningful & **detailed**

analysis with your customers.

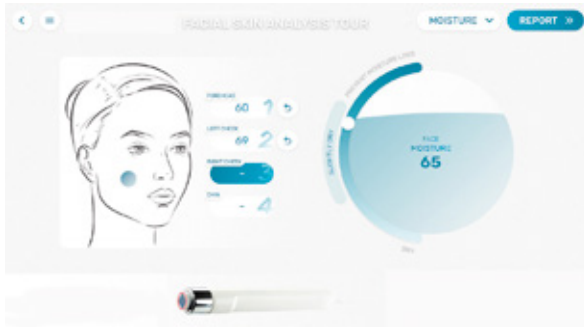

- **Guided** face tour or **free** face and body measurements with all connected probes and cameras possible.
- Address the top **skin concerns** of your customers.
- All **results and images** can be stored with your customers and can be viewed (history).
- Customize the program to **your CI** with only a couple of clicks (name, color, logo, images or videos).
- Personalized automatic **product recommendation** (in preparation).

- Provides functions to **export** measurement data that you can **import** into your own web-based interface.
- The application supports **touch screen** devices.

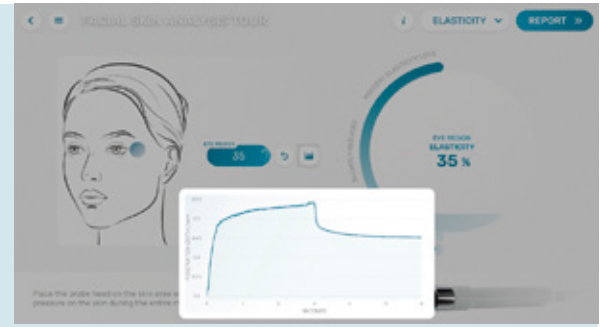

Take Your Cosmetic Consulting to the Next Level with the New Generation of Skin Analysis Software SCS

Facial skin analysis tour:

Get a detailed overview of your facial skin care needs through **guided measurements** with the connected probes and cameras.

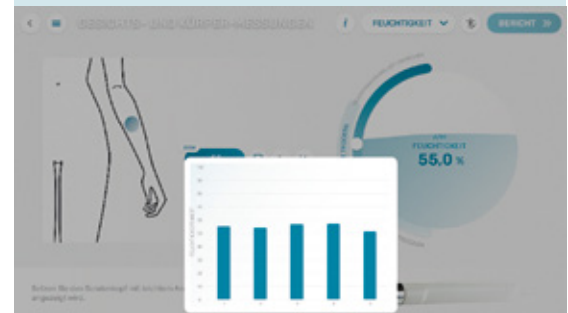

VisioFace® full face photography:

Frontal & lateral face images with automatic detection of **optimal ROI** and unique **evaluation options**. Swipe across images with impressive **filters** and **magnifying glass**. Pigmentation and blood vessels as well as pigment spots „as if under UV light“ become more visible in the original image.

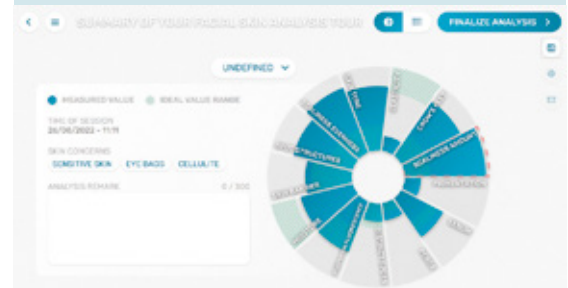

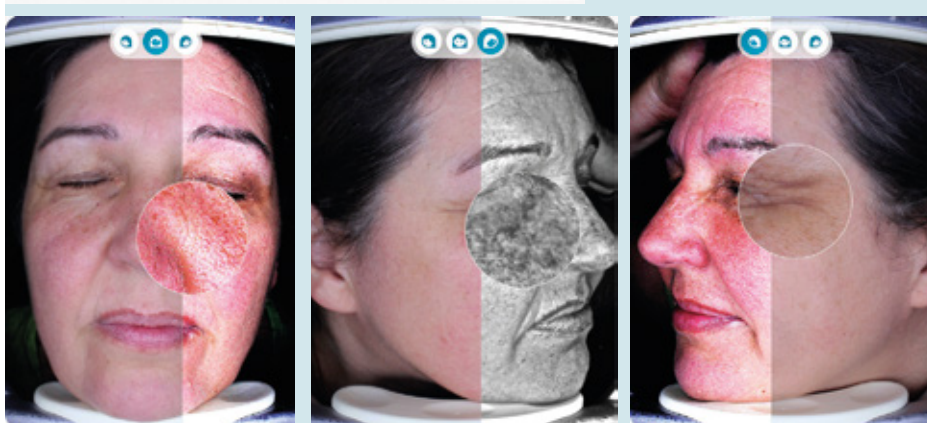

Face- & body measurements:

Take measurements and camera pictures of different parts of the body - there are no limits.

Summary and reports for your customers:

All **results, images & evaluations** are stored with your customers .
